"The super UFO fighter" is basically a space sport where you battle each other in 1 vs 1 duels on 3 different stages. You fly against other players, the difficulty of your opponents will increase. There are 10 enemy pilots in every stage. And each stage has 3 UFO pilots, as well as 3 different obstacles on the field. Each pilot will gain recognition and awards based on your performance in battles. ◆Playing and winning◆ Your goal is to control the target items and shoot your opponent to win the battle. Stage items to gain points are placed on the field, and you will be able to take and shoot the items in your path. You can use your shwoop beam to take the items, or throw a shwoop attack to throw, or throw and shoot. Any shot can take a shot, so you are not limited to just certain types of shots. The key to winning the battle is to accumulate as many items as possible and keep shooting your opponent. That's why you can change your path to a different stage and target any target item for points, even if you lose a battle. So you can hit the target item in the way of your opponent, and take the prize. ◆Tutorial◆ In the tutorial, your mission is to defeat 3 stages each containing 3 Pilots. To start off, you are the only one who can choose the first stage. But you should feel like the first thing you want to know is "how do I start a battle?" -Once you have started a battle, you will be able to choose the stage you want to start off on. -And when it comes to choosing the item to take, you can change your path so that you can take the items. -During a battle, you can stop to absorb the effects of items taken, and use them to your advantage. Learn to play as you go along with the tutorial, as you progress you will be able to select a level. ◆The Shwoopers!◆ The most recent trend of the Earth Shwooping bout is to battle with the space Shwoopers called "Shwoopers". You can compete with each other in 1v1, 2v2, and 3v3 duels. To start a duel, you and your friend will enter the battlefield. At the beginning of the fight, you'll be able to

Continue playing. Guys I need help..I've installed DOA6 2.18 on my Windows8.1 with a busted PS2 keyboard. I cant move my character or punch button! I don't understand what's happenng. Please HELP me. Then I'll buy you a box of chocolates or something. Contrarily, DOA6 allows you to import character data from a supported ROM or FBB file (PBR in the case of PS1). Further to the posting above, you can get the light version, cut the game and save on a storage medium of your choice. There's no support for multiplayer with a PS1 version of DOA, alas. You will be able to create a second FBB if you keep the instructions in mind, keep the instance code as close to the code from the PAL version and add a slight adjustment. It will just work. But where can I find this "Standard" PlayStation 1 version? No matter what I try to download, it's the "old style" which I want. I mean the version where you get the "upgrade" made by the company that made the game.For years, the West Antarctic ice sheet has been seen as a huge worry — an enormous glacier, floating in the middle of the ocean, that could one day calve off into a billion-ton-thunderclap of ice, crashing into the ocean and causing the most massive extinction event ever. The fear was that someday, water could flow into the ocean from beneath the ice sheet, up to 97 feet deep in places, and cause an end to all life on Earth. Scientists around the world have been hunting for clues about whether that could happen. Now, multiple new clues have come from a decades-old Antarctic expedition, a report published Thursday in the journal Nature finds. The expedition, conducted in 1980, found an ice cap that had a dead lake beneath it. That ice cap was some 30,000 years old, but happened to be located just below the West Antarctic ice sheet. It is the oldest such dead lake observed, and as a result, it has been assumed, people have observed how the ice sheet has altered. AD
